Professional Experience

Full-Stack Developer @ Wi-flix

09.2022 – current

- I worked in sprints and made sure I always complete my tasks on schedule

Software Developer @ Bismuth Technologies

04.2022 – 09.2022

- I spearhead the development of a social network that focuses on professional networking and career development for minorities (LinkedIn for minorities). Designed the database, backend, and UI for the software. Worked mostly with the backend team to present a well-tested and robust server.
- I worked with experienced developers to launch a donation application that helps users give away items they are no longer using or request items they need.

Software Developer @ Freelance

06.2022 – current

- I provided services for game, app, and web development.
- I kept effective communication with clients and teammates. Made sure to explain the process in detail to clients to involve them in all the aspects of the development process.
- I used the finest software development principles, and presented properly designed, tested, and efficient code. Delivered great software while beating all deadlines.
- I made sure that clients/teammates are well satisfied with my work.

Education

Bachelor of Science, Computer Science

University of Cape Coast – Ghana

Expected in 2024

📍 Cape Coast, Ghana

Professional Summary

Amenable Software Engineer gifted at translating basic client requirements into technical development plans. Communicates productively with both technical and non-technical personnel and clients. Friendly provider of deep programming knowledge and invaluable final products. Proud team player focused on achieving project objectives with speed and accuracy.

Volunteering

Core Team

Google Developer Student Clubs – University of Cape Coast

01.2022 - current

Partnered with other core team members (leads) to organize weekly meetups where we share our experiences with the community.

Projects

Campus Online

A responsive social space for college students featuring lots of features like creating, commenting, liking, deleting a post (posts can be an ad, poll, picture, video, or text. anonymous posts are supported), following and unfollowing users, configuring user accounts and preferences, real-time chat and notifications, and more.
